

WHY CHOOSE Long Island Select Healthcare, Inc?

With a rich history of understanding and meeting the needs of individuals with disabilities, Long Island Select Healthcare (LISH) is committed to ensuring that quality health care services are fully available to individuals with disabilities. The Health Center brings together a team of board certified physicians, dentists, psychologists, podiatrists, therapists and other health care professionals to address the unique health care needs of each patient, supporting him/ her in achieving health and wellness.

Our Health Centers are designed for individuals with a wide range of abilities and health needs, offering fully accessible primary and specialty medical care, dentistry, gynecology, podiatry, dermatology, mental health, rehabilitative and assistive technology services. From the moment a person enters the center attention to accessibility, convenience and privacy is evident. The buildings were designed with the input of doctors, therapists, other health professionals, and most importantly, patients and their families. Careful attention to detail is apparent in the Center's custom designed examination rooms, accessible equipment and expansive, full service gym. With the goals of ensuring patient safety, comfort and ease of use, the building's design and equipment exceeds the standards of the American with Disabilities Act (ADA).

The philosophy of the Health Centers staff is to listen to each patient's health concerns along with input from family, or other caregivers and to offer their professional expertise with an understanding of the patient's health goals. In this way, approaches to treatment are team oriented and ensure individualized care that will be effective for each unique patient.

CLINICAL SERVICES

Medical Services

Each of the medical rooms is designed to comfortably accommodate patients who may use mobility aids along with their family members or caregivers. All the examination tables are height adjustable allowing patients in wheel- chairs to transfer directly from their chair to the table with ease and dignity. The Ophthalmology Department boasts a freestanding eye examination machine, which can be moved or adjusted to a patient's wheelchair height if transfer to an examination chair is not an option.

Each member of the medical staff is board certified in his/her discipline and has expertise in providing medical services to individuals with disabilities. Long Island Select Healthcare physicians maintain close communication with other physicians in the community and neighboring hospitals when individuals require such care, thus ensuring well-coordinated treatment plans and optimizing the quality of the individual's health care services.

- Primary Care/Family Medicine
 - Adults
- Neurology
- Orthopedics
- Psychiatry
- Dermatology
- Gynecology
- Ophthalmology
- Podiatry
- Physical Medicine & Rehabilitation (Physiatrist)
- Audiology

Dentistry

Our Central Islip location's Dental Suite includes four rooms, each with a height adjustable, swivel chair that makes patient transfer easier. For patient comfort and safety, the dental rooms are designed to allow transfers from either side of the chair, depending upon the patient's preference. Each examination room has adjustable track lighting and fiber optic dental instruments to make treatment more comfortable for those patients who have difficulties tilting their head back.

We have three locations that offer Dental services. Each dental room offers digital x-ray equipment, providing a clearer more detailed image of the teeth and an ability to send images electronically. The Dental Suite's also features a state of the art panoramic x-ray system, allowing full mouth x-rays to be taken at once.

Mental Health Services

Long Island Select Healthcare provides an array of mental health services including diagnostic testing, medication management and individual and group counseling. Services are provided by experienced mental health professionals, including physicians, psychologists and social workers with expertise and specialized training in developmental and physical disabilities.
